SUMMARY

Solution oriented Software Engineer with 4 years of experience in developing and deploying scalable web applications. Proficient in **Java (Springboot)**, **React**, **AWS** and **Azure**, with a strong background in building serverless integrations and modern cloud-native solutions.

PROFESSIONAL EXPERIENCE

Software Engineer

Xoriant -India

08/2023 - Present

- Developed backend systems using **Springboot** Framework (Microservices), exposing REST APIs for Purchase Order, Work Order, and Tender workflows.
- Delivered API-first, client-defined contracts with **pagination**, filtering, validation, and standardized error handling to support multiple downstream consumers.
- Improved API performance and scalability by 30-40% using Java Virtual Threads to handle high-concurrency requests efficiently.
- Deployed containerized microservices on **AWS ECS (Fargate)** behind an **Application Load Balancer**, ensuring high availability and horizontal scalability.
- Implemented asynchronous processing using message queues (**AWS SQS**) to decouple long-running workflows and improve system resilience.
- Built and maintained cloud-based integrations using **Azure Logic Apps** and **Azure Functions**, enabling reliable, event-driven workflows.
- Applied **Spring Security** for authentication and authorization, following enterprise security best practices.
- Actively participated in code reviews, **CI/CD** pipelines, and production releases.

Associate Software Engineer

Xoriant - India

08/2022 - 07/2023

- Developed a monolithic backend exposing REST APIs for recipe upload, pagination, filtering and managing 1000+ recipe records.
- Integrated asynchronous processing using **Azure Queue Storage**, enabling parallel handling of recipe-processing tasks and reducing API response time by 20%.
- Added **Azure Blob Storage** for file storage.
- Deployed backend via **Azure DevOps** CI/CD to Azure App Service.
- Wrote testing using JUnit
